## MANAGEMENT DISCUSSION AND ANALYSIS

Economic Scenario

India continues to witness a very challenging economic environment. Growth remained weak and continued to decline throughout 2012-13. Declining growth is not the only economic problem. The current account deficit, which stood at 4.2% of G. D. P. for F. Y. 2012, is expected to be around 5% for F. Y. 2013. Both wholesale price inflation (WPI) and consumer price inflation (CPI) have remained uncomfortably high through the better part of the year.

There were some positive developments on the monetary front. The Reserve Bank of India (RBI) began F. Y. 2013 with a higher than expected 50 bps policy rate cut in April 2012. This was followed by two further cuts in the policy rate of 25 bps each — resulting in a total of 100 bps repo rate cut through the year. Therefore, while the RBI's policy stance remains focused on containing inflation, it has shown some adjustment to marginally ease interest rates.

During the second half of the fiscal year, the Government of India announced several reform measures such as increasing fuel prices and giving oil marketing companies greater freedom to adjust prices according to the global price of crude; opening of foreign direct investment (FDI) in different sectors, especially retail; setting up a high level committee to address much needed infrastructure investment; simplification of debt limits for foreign institutional investors (FII); and a fiscal consolidation plan under the aegis of the new Finance Minister. Simultaneously, oil, gold and other commodity prices have begun to ease. Hopefully, all these factors may aid growth in F. Y. 2014.

Even so, the challenges remain. The good news is that despite economic difficulties, the demand for retail finance remained fairly robust with the sector witnessing all-round growth. We expect retail finance to continue growing given the large untapped demand and a clear demographic shift in favour of a younger and more consumption and lifestyle conscious working population which should increase demand for homes and consumer durables.

Business Outlook

Non-Banking Finance Companies (NBFCs) continue to play a critical role in making financial services accessible to a wider set of India's population and are emerging as strong intermediaries in the retail finance space. Going forward, one should expect NBFCs to further strengthen their presence in retail finance and grow at a reasonably healthy pace. Chitrakut Holdings Limited expects to maintain its performance in FY2014 and hopes to grow at a rate faster than the growth of bank credit.

Analysis of performance for the year

The detailed highlights of the performance are produced elsewhere in the Director's Report.

Opportunities and Threats

The ever increasing demand for credit especially in the industrial and infrastructure sectors, requirement of working capital amidst all sectors, impetus on infrastructure development activities and technological advancement are factors which are seen as an opportunity for the growth of your company. However, with the increasing number of banking institutions and tightening of noose on the working of NBFCs by the Reserve Bank of India as also the rapidly changing regulatory compliances are being viewed as threats. Your Company is in a position to take advantage of the available opportunities and take

suitable steps to avert the threats.

Internal control system and their adequacy

The Company has an effective internal control system, commensurate with its size and nature to ensure smooth business operation, including assurance of recording all the transaction details, ensuring regulatory compliance and protecting the Company assets from any kind of loss or misuse.

Your Company has always given immense importance to its people as believes that the success of any organisation lies in the utmost support, co-operation, efforts, knowledge and expertise put in by them. The Company values the diverse qualities and culture its people bring to it. The success of the Company is attributed to the richness of knowledge, ideas and experience of its varied workforce.

Certain statements in the Management Discussion and Analysis describing the Company's objectives, predictions may be "forward-looking statements" within the meaning of applicable laws and regulations. Actual results may vary significantly from the forward looking statements contained in this document due to various risks and uncertainties. These risks and uncertainties include the effect of economic and political conditions in India, volatility in interest rates, new regulations and Government policies that may impact the Company's business as well as its ability to implement the strategy. The Company does not undertake to update these statements.
